

# The Message

by **enneade** © 2011

Listen to that faint Voice in your head  
Talking to you as you sleep  
The structures  
The colours and sounds  
Timeless truths for us to learn  
Is it more than a man-created God  
The driving force of the Universe ?

Like a preacher in a crowded desert  
How infuriating it must be  
To try and talk to those unwilling to listen

The Cosmic Messenger delivers his Message  
To all of us earthlings  
But are we really listening ?

Mankind still thinks of itself as a superior race  
Sending satellite messages throughout the cosmos

The Cosmic Messenger delivers his Message  
To all of us earthlings  
But are we really listening ?

What if the message we're trying to ignore  
Were the answer we've been waiting for ?  
Is this The Message ?

The Cosmic Messenger delivers his Message  
To all of us earthlings  
But are we really listening ?
